Peter Doyle
Chief AM Branch
Federal Communications Commissions

Good Morning,

We recently were of informed the decision of the FCC to cancel the licenses related to the WAPA as AM Radio synchronous boosters.

During the period that WAPA has the AM Radio synchronous boosters, we have been able to see the useful and consequent of this system. Currently, WAPA has been able to maintain a strong presence of its signal in our region, resulting that the people is informed, oriented and educated with its daily dynamic new programs.

The system of AM Radio synchronous boosters of WAPA demonstrates its effectiveness, not only for the listener, but also for broadcasters, as it can be operated the system with fewer resources compared to the traditional method of transmission.

For this reason, we respectfully request to re-evaluate and revert FCC decision to cancel the licenses of those actually in use.

Respectful,

Cesar A. Vera
General Manager
WRSS-1410am
